dependability and cost effectiveness are primarily seen as instruments for conducting international trade in the free market environment these factors cannot be considered in isolation of each other this handbook considers all aspects of performability engineering the book provides a holistic view of the entire life cycle of activities of the product along with the associated cost of environmental preservation at each stage while maximizing the performance

this book is intended to describe how to leverage emerging technologies big data analytics and sdn to address challenges specific to lte and ip network performance and fault management data in order to more efficiently manage and operate an lte wireless networks the proposed integrated solutions permit the lte network service provider to operate entire integrated network from ran to core from ue to application service as one unified system and correspondingly collect and align disparate key metrics and data using an integrated and holistic approach to network analysis the lte wireless network performance and fault involves the network performance and management of network elements in eutran epc and ip transport components not only as individual components but also as nuances of inter working of these components the key metrics for eutran include radio access network accessibility retainability integrity availability and mobility the key metrics for epc include mme accessibility mobility and capacity sgw pgw capacity and connectivity in the first parts of the book the authors describe fundamental analytics techniques and various key network partitions ran backhaul metro and core of a typical lte wireless service provider network the second part of the book develops more advanced analytic techniques that can be used to solve complex wireless network problems the second part of this book also describes practical and novel solutions for lte service network performance and fault management systems using big data engineering self organizing network son architecture is presented as a way to utilize network performance and fault analytics to enable network automation son can significantly improve operational efficiencies and speed up network deployment this book provides various ways to leverage data science to more intelligently and reliably to automate and manage a wireless network the contents of the book should be useful to professional engineers and networking experts involved in lte network operations and management the content will also be of interest to researchers academic and corporate interested in the developments in fault analytics in lte networks

campus network architectures and technologies begins by describing the service challenges facing campus networks and then details the intent driven campus network architectures and technologies of huawei cloud campus solution after reading this book you will have a comprehensive understanding of next generation campus network solutions technical

implementations planning design and other know how leveraging huawei s years of technical expertise and practices in the campus network field this book systematically describes the use of technical solutions such as virtualization big data ai and sdn in campus networks you will be able to reconstruct campus networks quickly and efficiently utilizing this informative description additionally this book provides detailed suggestions for campus network design and deployment based on huawei s extensive project implementation experience assisting with the construction of automated and intelligent campus networks required to cope with challenges this is a practical informative and easy to understand guide for learning about and designing campus networks it is intended for network planning engineers network technical support engineers network administrators and enthusiasts of campus network technologies authors ningguo shen is chief architect for huawei s campus network solutions he has approximately 20 years experience in campus network product and solution design as well as a wealth of expertise in network planning and design mr shen previously served as a system engineer for the campus switch data center switch and wlan product lines and led the design of huawei s intent driven campus network solution bin yu is an architect for huawei s campus network solutions he has 12 years experience in campus network product and solution design as well as extensive expertise in network planning and design and network engineering project implementation mr yu once led the design of multiple features across various campus network solutions mingxiang huang is a documentation engineer for huawei s campus network solutions he has three years of technical service experience and four years of expertise in developing campus network product documentation mr huang was previously in charge of writing manuals for huawei router and switch products he has authored many popular technical series including be an ospf expert insight into routing policies and story behind default routes hailin xu is a documentation engineer for huawei s campus network solutions he has two years of marketing experience in smart campus solutions and six years of expertise in developing network products and solution documentation extremely familiar with huawei s campus network products and solutions mr xu was previously in charge of writing manuals for huawei routers switches and campus network solutions in addition he has participated in smart campus marketing projects within such sectors as education government and real estate
